

A new Mantid profiler

Neil Vaytet & Igor Gudich
Data Management & Software
Centre, ESS, Denmark

Four simple steps

1. Compile Mantid with

```
cmake -DPROFILE_ALGORITHM_LINUX=ON ..
```

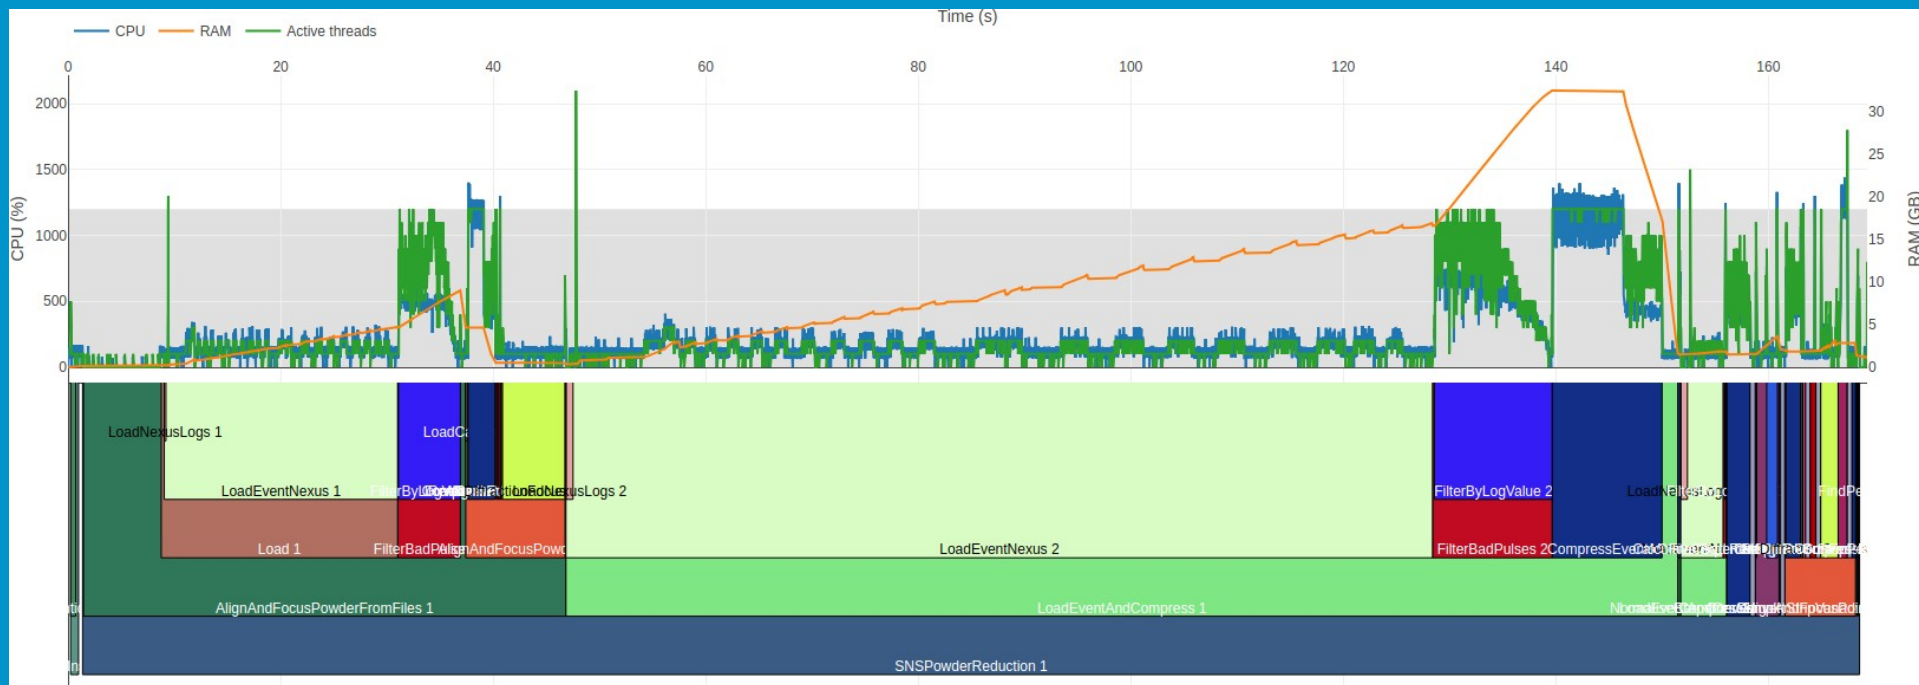

2. Clone the mantid-profiler repository

```
git clone https://github.com/nvaytet/mantid-profiler.git
```

3. Run your workflow and attach the profiler to it

```
python SNSPowderReduction.py & python  
path/to/mantid-profiler/mantid-profiler.py $!
```

4. Open the `profile.html` file in your browser
